

TOP SECRET

DAILY STAFF MEETING

Tuesday, 17 July 1951

[redacted] noted that a cable had been received from Mr. Dulles indicating that so far his trip was progressing satisfactorily, and that he would submit comments later on the organization of the office of [redacted]

Mr. Reber stated that the Intra-CIA Requirements Committee had developed a pattern for covert reporting on the Soviet orbit which has been accepted by [redacted]. He also stated that ONI has submitted a request for an IAC sub-committee to develop coordinated requirements from the covert side. It was Reber's belief that if such a Committee was appointed it should consider requirements from both the overt and covert collectors. This matter will be discussed at the next AD's meeting.

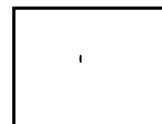

Mr. Reber gave a brief report on the operations of the Watch Committee, and noted that at the present time it was apparently fulfilling its mission to the satisfaction of the DCI and the IAC Agencies. In this connection, [redacted] now has a representative who sits with the Indicator Committee, which Committee meets preceding the Watch Committee meetings. [redacted] stated that he believed that the D/DCI and AD/CI should attend Watch Committee meetings from time to time.
